

Vinyl Cutter Instruction Guide

The Sure Cuts A Lot Pro software is used to print professional quality designs and shapes onto vinyl.

1. Locate and open **Sure Cuts A Lot Pro** software on the desktop.
2. Power on vinyl cutter unit (far side panel).
3. Lower the wheel pressure bar (Orange asterisk).
4. Slide media in through front or back making sure vinyl is square in machine.
5. Raise the wheel pressure bar (Orange asterisk).
6. Using the ↑ and ↓ arrows, select either "Sheet" or "Roll1" or "Roll2".
7. Press the "enter" button on control panel. ↵
8. The cutter will now measure and display the cuttable dimensions (These dimensions are important). To see dimensions again, press the "enter" button on the machine.
9. On the PC, enter your "**Mat Size**" dimensions (This should be the dimensions of the vinyl sheet you have loaded in step 8).
i.e. "**Cutter**" → "**Mat Size**" → "**Custom**".
10. You can now use the "**Library**" to design your image.
11. By clicking on a shape/design, it will be added to your "**Cut Area**".

12. The image selected will have **8 icons** surrounding it. These icons will allow you to modify the **scale, position** and **rotation** of the object.

Adding Fonts/ Text

13. Fonts can be added by selecting the "**Fonts**" tab in the Library window.

Trace an Image (.jpg,.png,.bmp, etc.)

14. To trace an image, locate the "**Trace Image**" icon. 

Cutting

15. When ready to Cut, click on this icon.
